

## ***NBS will introduce APEX visitors to the Evolution of EMS***

Leading EMS provider NBS ([www.nbscorp.com](http://www.nbscorp.com)) will showcase its extensive portfolio of engineering and manufacturing services at IPC APEX EXPO in Las Vegas April 6-8.

Key NBS team members will be on hand at booth #2141 to meet with visitors and explain in detail the breadth and the uniqueness of NBS services including design, consultative technical advice and support which combine to abbreviate the development process.

“NBS was founded in 1999 as a PCB layout service bureau,” recounts Chris Alessio, VP Sales and Marketing. “And our expertise continued to grow over the ensuing years. We operate three strategically located design centres in the US and one in SE Asia, and our specialized skill and experience in board design is a key contributor to our success as a high quality manufacturing services company.”

NBS President and CEO Michael Maslana explained further, “We welcome a large diverse customer base who appreciate our wide range of engineering services and the consistent high quality work product we provide. Our extensive capitalization and innovative manufacturing techniques allow NPI to peacefully and successfully co-exist alongside volume production. Our latest being implementation of in-line Radio Frequency Identification (RFID) system to provide our customers with full electronic product traceability.”

NBS evolved into a full service contract manufacturer in 2004, which today includes both NPI and high volume PCBA offerings at their Santa Clara headquarters. NBS has continued expanding their scope of services to include advanced supply chain logistics, custom products sourcing and a wide array of verification services. Test capabilities at the firm now include advanced AOI, automatic 2D and 3D X-ray, ICT, FCT, BIT and flying probe technologies. NBS also offers test program development,

boundary scan development and test, fixture design and manufacturing and a range of diagnostic and rework services.

## ENDS

### About NBS

NBS (<http://www.nbscorp.com>) is a fully integrated EMS provider headquartered in Northern California. NBS provides end-to-end solutions that include leading-edge services in design engineering, manufacturing engineering, NPI, production, supply chain and logistics, test, box build and systems integration.
